

Oppnå flere sprøytedager med HARDI TWIN

Værdata viser at vind fortsatt er en utfordring. HARDI TWIN-bommen, som allerede er best i klassen når det gjelder avdriftsreduksjon og gjennomtrengning, gir deg maksimal sprøytekapasitet og øker samtidig antall mulige dager i åkeren sammenlignet med konvensjonelle bomber*.

Ikke la vinden være en utfordring – velg HARDI TWIN

The Wind Data examination sheet from, provides calculated wind data to highlight the benefits of the HARDI TWIN FORCE boom.

The data is drawn from reliable sources (KSS, DMI, SST etc.) and treated by HARDI, to showcase TWIN benefits during the spraying season.

HARDI does not assume responsibility for any discrepancies or inaccuracies, in the provided weather data.

Please note that while the data is diligently sourced and processed, it does not cover other weather factors, and thus should be used as a general guide rather than a precise forecast.
